

WHAT THE RAMAPO WATER WORKS LIKE.

Charles La Mont Has a Heavier Yellow Yield Military Bearing and Even Than That of Hypnotic Eyes.

BEARDED LIKE A PARD. \$15,000,000 FOR YUKON.

Friend of Cooper, Greeley, Tilden and Blaine Who Favored His Water Scheme.

Charles A. La Mont, central figure in the Ramapo Water Company, whom Supreme Court Justice Gaylor testified before the Mazet Committee had offered him \$50,000 worth of the company's stock and the presidency of the company in exchange for his influence in the company at the house of his sister, Mrs. Post, No. 174 South Mountain avenue, Montclair, N. J. His trouble is said to be nervous dyspepsia.

Poor more interesting figures have been connected with big deals of any kind than this Mr. La Mont. As far as friends go, no man in this country ever had a better list. He was, during their lifetimes, the intimate personal friend of Horace Greeley, Samuel J. Tilden and Peter Cooper. These men, too, believed in his scheme for supplying water to this city and Brooklyn. President Arthur gave him a responsible position in the War Department. While he was there President Arthur aided him in many ways to have the water scheme for the big water scheme he was planning, as did General Tracy and James G. Blaine.

Once Seen, Never Forgotten. Mr. La Mont is a remarkable man in his personality. He has a peculiar personal appearance, too. Once seen, there is no danger that he will be forgotten.

Mr. La Mont is six feet in height. His long gray beard extends almost to his waist line. His eyebrows are so shaggy and overhanging and his eyes so piercing that their owner has been accused of hypnotic powers. At any rate, the glance of his eyes under their shaggy brows has a peculiar effect on the person to whom he may be speaking.

Mr. La Mont has a large, well-shaped head, almost masculine. He has a military and carries the idea of self-confidence in his possessor to the utmost limit. In the days when the water scheme was in the air, Mr. La Mont was one of its most conspicuous figures. Many men of his time regarded him well at the time. This gruff hand of the Ramapo Water Company came into this world very modestly, for his parents were of humble circumstances.

His Modest Beginning. Charles A. La Mont was born near Turner's, Monroe County, New York. His father was a farmer. In young La Mont's earlier years he worked hard on the farm. He was still a lad, though, when he left home to shift for himself.

First he went to Albany, but Albany wasn't large enough for him. He kept on till he found himself in New York City. Here he had a struggle with untoward circumstances. For a living during his working hours he peddled milk, drove street cars and had a job in a machine shop. With the time he could call his own he occupied himself in inventing, for which he had no little talent.

Finally he secured a patent that made him not a little money. He improved the opportunity to rent an office in the Cooper Union Building. He then met Peter Cooper. The men became friends. Even at this time the idea of a water supply for the city had come into La Mont's mind. He interested the great philanthropist in his scheme, and Mr. Cooper, willingly assisted La Mont in many ways.

With the invention of what was known as the dedicated egg process La Mont came into apparent wealth, good fortune, and with it the desire for big returns.

Man of No Politics. He supported Grant, Greeley and Tilden for the Presidency. He did not seem to have any regular politics. He was for his friend at the time. He took his embryo water scheme to Samuel J. Tilden. He got around and came into La Mont's mind. He had no doubt that it would be a success some time.

When Arthur failed of a renomination Mr. La Mont had to leave his position in the War Department. After that he was known about the Astor House as a man of means and a successful business man. One knew or pretended to know.

The La Monts have a summer home at Sag Harbor, L. I.

SINGING CLASSES FREE FOR ALL.

Teaching of Music is Resumed in the Various Districts.

Free elementary classes in singing have begun, again everywhere, their fascinating lessons. They are novel and interesting. They are serious and diverting. To attend them a man's title is eighteen, a woman's sixteen, years of age.

One need not like music or have a voice. One need only desire to know the language that the notes represent, and who does not? Frank Damrosch is the director of this new form of public instruction here.

Soon ignorance of music is to be regarded as a serious fault. The critics clamor against the indifference of the educated who do not understand the mysteries of harmony in the lyrical dramas of Wagner. That would they not say, if they knew that many, many educated persons cannot even read the notes printed on a page of music?

Mr. Damrosch intends that there shall not be an excuse for them. Classes are at the University settlement, at No. 184 E. 14th street; in Beethoven Hall, at No. 210 Fifth street; Lenox Hall, Twenty-third street and Eighth avenue; Friendly Aid Hall, No. 248 East Thirty-fourth street; Turn Verein Hall, No. 905 West Fifty-fourth street; Musician's Hall, No. 203 East Fifty-sixth street; Brady's Academy, Amsterdam avenue, 120th-130th street; Belling's Casino, East 103rd street and St. Mark's avenue; Madison Square Garden, 22d East 124th street; Judson Memorial Hall, Washington Square South.

In Brooklyn the classes are in Penn-Park Hall, Pennsylvania avenue and Fulton street; Knickerbocker Hall, No. 103 E. 12th street; Hanson Place Baptist Church, South 10th street, and Kooch's Hall, No. 1246 Bedford avenue.

Students are trained there at deciphering popular songs, dances, symphonies, oratorios. They may enter ignorant of the universal language and leave illuminated by all its revelations. They may be poor and destitute of hope even at their initiation, and learn suddenly that they have the gift of the men who make for times.

Frank Damrosch has in his devotion as a music teacher to the people a selfish idea that he tells very frankly. He has found that in his classes, he will discover or create singers, players and composers for the Oratorio, Symphony and other societies, who will excel all others in the world where it is the habit of Americans to excel.

MILKY-WHITE BEAR.

A Heavier Yellow Yield Even Than That of Last Year.

\$15,000,000 FOR YUKON.

The Boer-British War Will Not Pull Down the Total Very Much.

The gold output for the year 1898 will be in advance of the quantity produced last year. How much this advance will be cannot be computed with any show of exactitude at this date, owing to the conditions in South Africa.

The records thus far available fail to point to any part of the world where the gold mines are not yielding metal in greater proportions than a year back.

The gold receipts this year have been the largest on record at the Denver Mint. In Cripple Creek and other Colorado districts the increase in production is remarkable. California, too, has had plenty of water, where for two years she has suffered from drought. This has brought its full measure of activity to the mining centers of the Rocky Mountains. In Georgia there are new preparations making for gold mining on a grand scale.

The Yukon region, in Canada, will give at a low estimate \$10,000,000, where the 1898 yield was only \$10,000,000. The gold mines of Nova Scotia promise the largest output they have ever recorded.

The activity in gold mining in Australia is unprecedented. In five of the seven colonies the returns for seven months, including last July, were \$38,633,000, which beat the same period in 1898 by above \$7,000,000.

The total production of Australasia for the eight months including August shows \$47,000,000, or an increase of 25 per cent over the same month a year ago. Western Australia, for the first time, this year takes a leading place among the colonies as a gold producing country.

The Russian mines are rather difficult to gauge in the matter of current production. The great Siberian placers are producing over the same month a year ago. Western Australia, for the first time, this year takes a leading place among the colonies as a gold producing country.

KILLED ON HER FIFTH BIRTHDAY.

Sophie Frank Run Down While on Hospitality Intent.

WAS GOING FOR CANDY.

Supply for Her Party to Her Little Guests Was Short.

Little friends of five-year-old Sophie Frank were to have made merry at her birthday party last night. Instead, they went over her crushed little body, for Sophie was dead. She was run down by a trolley car while on her way to purchase sweets for her invited friends.

The Franks live at No. 297 Jackson avenue, Long Island City. There had been great preparations for little Sophie's party. All of the neighborhood children had been invited, great quantities of food had been cooked, a man was to play a fiddle, and the little ones were to dance. Final arrangements were completed yesterday morning about 10 o'clock, when Mrs. Frank discovered that there was not enough candy to go around the healthy throng of youngsters that she expected. Giving little Sophie some money, she sent her to the candy store.

The child stopped on the sidewalk to talk to some of her prospective guests, and then started on a run across the street. Trolley car No. 187, of the New York & Queens County Railroad, was approaching. Little Sophie, intent upon her errand, did not see it. She was struck and ground down under the fender.

When the little body was taken out life had departed. A policeman picked it up, reverently carried it upstairs, and laid it gently on a couch in the room where the birthday presents were spread. He had been preceded by a woman of the neighborhood, who broke the terrible news to the mother and brothers and sisters.

The motorman of the car was arrested. Witnesses of the accident agree that he was exceeding the safety limit in speed. The portion of Jackson avenue that was marked by the killing of little Sophie Frank has been a favorite speeding ground for motorcars wishing to make up lost time on the trip to the ferry.

KATZU WATANUKI, the celebrated Japanese artist, will paint, FREE OF CHARGE, quaint and artistic conceptions in colors or silk or satin for Pillow Covers, Scarfs, etc., or upon any article purchased in our store.

ELECTROD GAS IN ENGLISH MAN.

A Yorkshire Hamlet Takes the Initiative in Modern Methods of Lighting.

London, Sept. 30.—The first place in Great Britain to be illuminated with the bright white light of electro-d gas is Hammanby, a Yorkshire village near Scarborough. This new illuminant is composed of acetylene with the admixture of inert matter and a proportion of oxygen. Its manufacture is of the simplest nature, as could be gathered from the explanations given yesterday to the company that assembled at this village on the occasion of the opening of the new gas works.

The gas can be delivered through any ordinary gas main at the usual pressure, measured by means of gas meters, and charged for in the same way as is the custom where ordinary coal gas is used. The light is perfectly white, and is equal to 250 candle-power, as against the average seventeen candle-power of coal gas. The ancient little township of Hammanby, near which Lord William Cecil lives in Hammanby Hall, for the first time in its history is now brilliantly lighted.

The light has also been installed in the church and at the hall, and Mr. T. G. Marsh, who introduced the penny-in-the-slot system, is arranging for a supply of the new gas to smaller consumers on this principle.

The Scarborough District Lighting Company, Limited, is eager for more business in lighting up the dark places of rural Yorkshire.

The company expect to do business also with the neighboring manor of which many badly supplied with light abound in the district proposed to be covered by the company.

The Real Need. "A self-opening and closing umbrella has been invented."

"That's no good. What the world wants is an umbrella that will find its way back home when stolen."—Detroit Free Press.

"All Tired Out."—Revelation for Women Who Are Weak, Nervous, Blue, Discouraged.

If there is any person who deserves pity, it is the woman who, with all her work to do, suffers from ill health, female weakness and nervous prostration. She feels weak, tired, and dragged out by her nerves, and is unable to do her work. She has headaches, backache, and is unable to sleep well, and wakes morning after morning with aching limbs. She feels like crying without cause, and is blue, discouraged, and altogether miserable. Such sufferers can be easily cured by using Dr. Greene's Nervura blood and nerve remedy. It is the greatest restorative and health-giving woman's cure ever known.

Mrs. A. N. Radley of Carteret, N. J., says: "I was a sufferer from nervousness and female weakness, together with painful menstruation for eight years. I used Dr. Greene's Nervura blood and nerve remedy, and in three months I was cured. I feel like a new woman now, and I will give you my best counsel and valuable advice, founded upon my many years of successful treatment, as a specialist in women's complaints, absolutely without charge or cost to you. Send me your name and address if you wish to know the most certain and
